MOUNT UP TO 30 TOOLS

MOUNTING ON WOOD

MOUNTING ON
PERFORATED PANEL

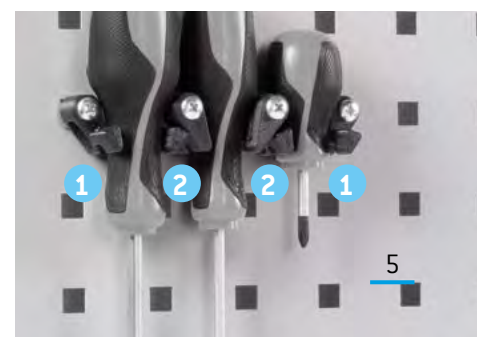

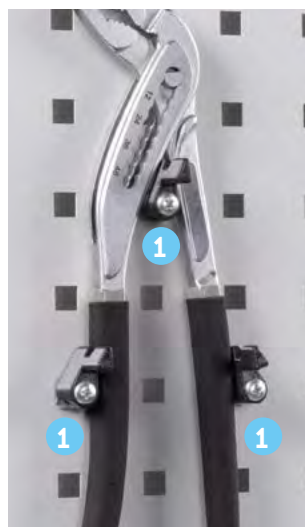

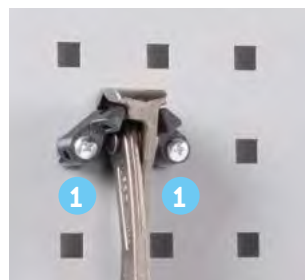

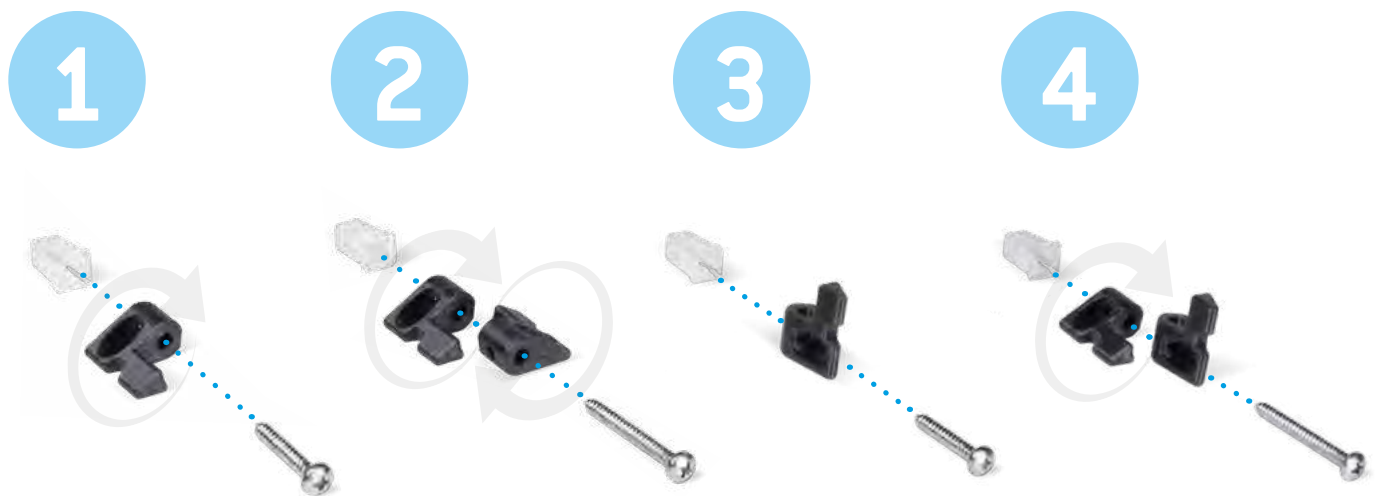

combine any way you want

Unipok is the name of the new universal hooks from Fami, which use a screw-in system to allow positioning on perforated panels or wooden panels.

Each Unipok hook can be positioned a different angle to mount tools with different shapes and dimensions. Free your imagination and optimise organisation of your wall or workbench-mounted perforated panel and wooden board, making sure that everything is always close to hand!

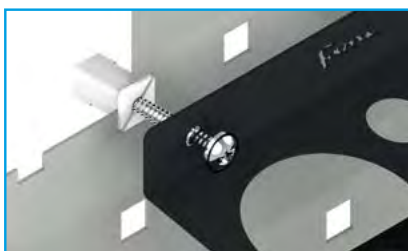

UNIPOK MAKES ORGANISATION CHILD'S PLAY!

x4

Iron Team is a wide range of accessories to meet an array of organisation requirements.

Mounting using a block-and-screw system ensures a universal product, allowing use on multiple surfaces: perforated panels, wooden panels or walls. AVAILABLE IN RAL 7016 COLOURS.

OPTIMISE ORGANISATION, ORDER AND STORAGE OF EVERYTHING YOU NEED FOR YOU WORK WITH IRON TEAM!

MAGNETS

PRODUCTS ON SALE FROM
DECEMBER 2020

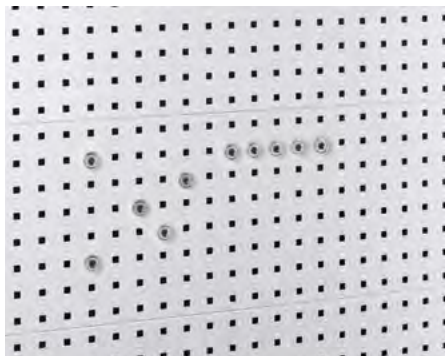

IDEAONE05108

COMPRESSED-AIR SET

WITH BALANCER AND FILTER

IDEAONE05187

The set includes:

- 1 Ø 10 mm flexible hose - 1 1/4" T-connector with cap [B]
- 2 stops - 2 slide attachments - 1 carabiner
- 1 balancer with 1600 mm steel cable
- 1 universal 1/4" attachment for tools
- 1 spiral tube with 5.5 mm inner diameter
- 1 tube with 5.5 mm inner diameter for clearing the filter
- 1 regulating filter unit with pressure gauge - which can be used with a maximum pressure of 10 bar, with flow rate of around 9 litres per second (connection point A) and 11 litres per second (connection point B) with working pressure of around 6.3 bar (the flow rate can vary according to the technical specifications of the pneumatic system to which the Fami equipment is connected) - 1/4" connectors

MASTER

WWW.FAMISPA.COM

SEGMENTED ANTI-TILT BAR

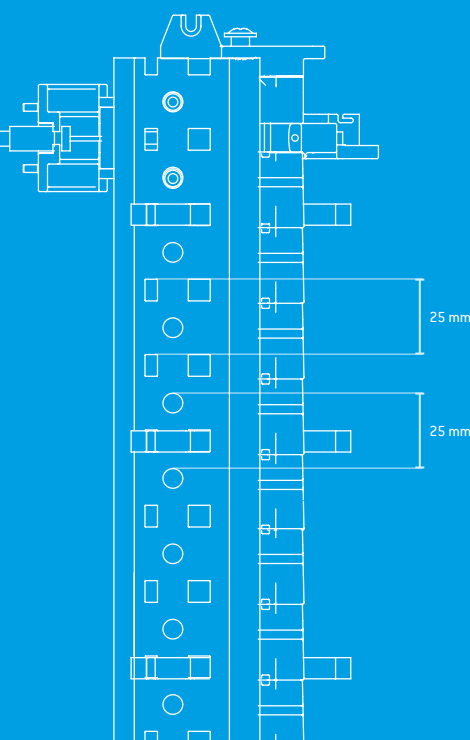

✓ The bar is made from aluminium and remains **fixed, without rotating**. A static object experiences reduced stresses and allows **more precise design**.

✓ The closure action is performed using blocks that move vertically, exploiting one of the elementary physical forces: **gravity**. The simpler the motion, the less chance of breakage.

✓ The bar is perforated with 25 mm pitch and allows application of **multiple closure heads**. This allows access to drawers to divided into multiple groups. Grouping is height configurable.

The smarter the design, the easier it is to use.

HEART & MIND

CUSTOMISABLE HANDLES

A WEALTH OF INFORMATION

Add barcodes, labels or images to handles for quick **identification** of the **contents** of each individual **drawer**.

GREATER VIEW

FULL VIEW OF CONTENTS

Extension limit and shape of the cabinet ensure a **full view of the contents** of upper **drawers**.

MAS

ANTI-TAMPERING SYSTEM

TOP SECURITY

Unlike other cabinets currently on the market, the **patented closure system** prevents thieves from by-passing the closure. Any forced opening will always be visible.

FULL EXTENSION

FREE TO CONFIGURE

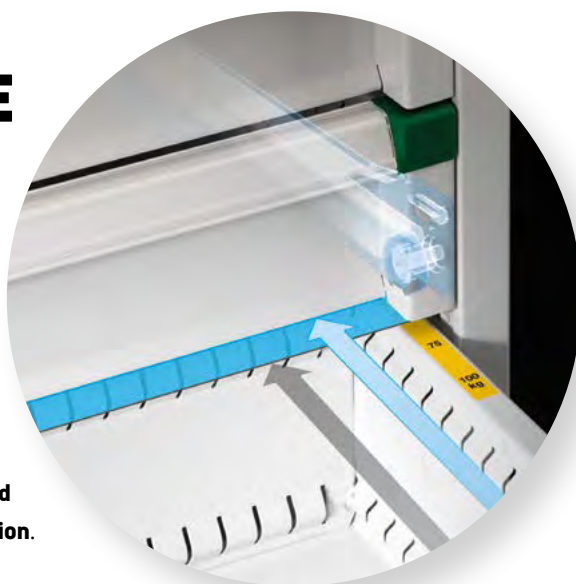

Quickly and easily modify extension of the drawer to **increase the load capacity up to 100 kg.**

HIGH-PERFORMANCE RUNNERS

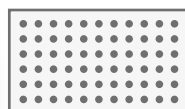

QUICK MOVEMENT WITHOUT PROBLEMS

The long runners and the draw itself allow the **bearing** to be moved to the **front** of the cabinet, increasing **visibility, load capacity** and **extension**.

PERFORATED DRAWERS

ORGANISATION DOWN TO THE MILLIMETRE

Holes and slots on the drawers make it easier to add internal **dividers** for **perfect organisation** of tools and materials.

ECOLOGICAL STORAGE

Ecological containers compliant with applicable laws on environmental protection, including safety in situations with risks and safeguarding of land, soil and aquifers. The shape of the bottom has been developed to allow handling using forklifts and pallet trucks. It is recommended to position these containers on flat, protected surfaces under atmospheric conditions that could affect proper performance. **TANKS COMPLIANT WITH ITALIAN LEGISLATIVE DECREE 152/2006 ON THE ENVIRONMENT.**

safety TRAY

IDEAONE17005

Safety tray in sheet metal with grille for 1000 l container
Number of tanks: 1. Without raised support. Colour blue RAL 5012 + galvanised - dim. mm: 1350×1500×630 H.
TANK NOT INCLUDED

PLASTIC TANKS

Designed for storage and decanting of barrels and tanks, these plastic tanks are suitable for use with liquids that are compatible with polyethylenes, such as acids, alkaline solutions, oils, and non-flammable chemical substances. The removable grille is made from polypropylene, and the structure is in yellow ecological linear polyethylene, designed as a single unit without joints. The raw materials used for production of the tanks are 100% recyclable to minimise the environmental impact in the case of disposal.

Changing lockers can be composed of 1 to 4 units, available in various widths: 30, 40 and 58.5 cm. Depending on requirements, the top can be horizontal or slanting which, combined with the clean/dirty divider, increased the level of cleanliness of the locker and the surrounding environment. The inner space of the changing locker can be further divided by a fixed or adjustable galvanised shelf.

STEEL

FAMI metal containers and boxes are the perfect solution for storage and handling of materials that needs to be immediately available, both in warehouses and production and assembly departments. Made from cold-rolled polished steel sheet, they are strengthened with special banding on the sides and bottom to increase load resistance and avoid deformation on impact.

PICKING BOX

Picking Box polypropylene containers represent the perfect solution to all storage problems, in warehouses, workshops, and along assembly lines. They allow the contents to be kept close to hand and visible, for extremely easy picking. These containers are safe and stable when stacked and materials are easily accessible even when they are overlapped.
